Based on the information provided, it is more likely that X is b321 who likes to 4l5i.

The reason for this is that the occupation b321 is linked to the property cdf14, which describes X's hair. This suggests that X's occupation may involve working with hair, such as being a hairstylist or barber. The hobby 4l5i, which is linked to the activity rfg5a, could be related to the outdoors, such as hiking or camping. It is likely that someone who works with hair would have an interest in the outdoors, as it could provide a sense of freedom and relaxation from the confines of their occupation.

In contrast, the option that X is b321 does not take into account the additional information provided about X's clothing style a214s or their activity rfg5a. It is possible that X's occupation and hobby are not related to their hair or clothing style, but without further information, it is difficult to say for certain.
